

MUKESH SINGH NEGI

(Cloud and Data engineer)

+918573947758 | Dehradun, Uttarakhand | mukesh7758negi@gmail.com | [Linkedin](#) | [Portfolio](#) | [Blog-Website](#)

Summary

Confident, active learner and a data enthusiast. Passionate about distributed systems with 3+ years of hands-on experience in big data and cloud technologies. Looking for opportunities to enhance my skills.

Education

- **Bachelor of Technology (Computer Science) (2016 – 2020)**

DIT University Dehradun, Uttarakhand
CGPA – 7.5

- **Senior Secondary (2014 – 2015)**

Kendriya Vidyalaya, Jhansi, Uttar Pradesh
Percentage – 85 %

- **Secondary (2012 – 2013)**

Bal Bharati Senior Secondary school, Haridwar, Uttarakhand
Percentage – 85.5 %

Experience

Infosys Limited - Specialist Programmer

Mar 2022 – present

- Designed, developed and deployed an automation into AWS cloud to consume real-time GPS data generated by vehicles and load into snowflake data warehouse after flattening and applying transformation as per business requirement.
- Created CloudFormation templates (IAC – Infrastructure as a code) for smooth migration of automation to the higher environment.
- Worked on the enhancement, bug fixes, flow chart and technical documentation.

Infosys Limited - Digital Specialist Engineer

Dec 2020 – Feb 2022

- Designed, developed and deployed an automation into AWS cloud to consume and process Realtime streaming data generated during the swipe-in/swipe-out by the employees and publish to downstream applications after applying transformation.
- Created CloudFormation templates (IAC – Infrastructure as a code) for smooth migration of automation to the higher environment.
- Worked on the enhancement, bug fixes, flow chart and technical documentation.

Infosys Limited - System Engineer specialist

Sept 2020 – Nov 2020

- Developed an automation script to migrate historical data from on-premise servers to AWS cloud using python and AWS services.
- Developed an automation script to migrate data from SQL server to snowflake.
- Developed a cloud automation to provide customers with their corresponding contracts from AWS cloud.
- Worked on the enhancement, bug fixes, flow chart and technical documentation.

Technical Skills

Languages: C++, Python, Spark, Pyspark, SQL, Bash script, Scala

Databases: MySql, MongoDB

Cloud: AWS (EC2, ECR, EMR, ECS, CI/CD, Redshift, Kinesis, Firehose, RDS, Lambda, Step functions, DynamoDB, SQS, SNS, Glue, Athena, S3, IAM, CloudFormation, SDK, Secret manager, KMS, CloudWatch, Event Bridge)

Tools: Databricks, Snowflake Datawarehouse, Airflow, Docker, Linux, Git

Other: Problem solving, Data structures and algorithms.

Training & Certification

- Certified AWS cloud practitioner
- Trained on Big Data technology in Infosys Limited
